2. Explain the nature of the program/activity? How will students and/or the campus as a whole benefit by the funding of this proposal? How will the program/activity be advertised to all students? Who is the targeted audience? Please be as specific as possible.

Festive gold star balloons take your team parties, holiday celebrations, anniversary parties, and other celebrations to new heights! Add to a basket, flower arrangement, or gift... or create a giant bouquet to make it a stellar occasion. Plus, sturdy foil material holds helium longer than latex balloons and is not easily popped. Balloons arrive uninflated; however, foil balloons purchased online can be inflated at your local Dollar Tree store at no additional cost. Due to the the nature of helium supplies, it is important to please schedule with the store manager so as to make sure the store has the helium necessary to fill your balloons. Also, please present a copy of your purchase receipt when entering the store to have your balloons inflated.

Elephants - Good Luck Minis®

★★★★★
2 Reviews

Item #340222

• 192 Pieces Per Bag. Only Available in Bulk Purchase.

• African Elephants are the largest land animals on Earth today, weighing between 2 and 7 tons. They are distinguished from Indian Elephants by their larger ears, greater size, and the fingerlike feature at the end of their trunks.

• **Scientific Name:** Loxodonta africana

• **Characteristics:** Even these tiny Elephant figures reveal the grace and power of the noble creatures. They could be part of an Africa-themed gathering or art project, decorations for an elephant-themed party, or as educational toys in a unit on conservation or African animals.

• **Size and Color:** Just like the real thing, slate grey is the primary color of these Elephant figures. They're about the size of a large cherry.

• Elephants are part of the Good Luck Minis® collection

• All of our products are Non-toxic and BPA free

Product Info Reviews Q&A Did You Know

History

The first known proboscidean appeared in Africa around 60 million years ago, just a blink of the eye after dinosaurs went extinct. It stood only 3 feet tall at the shoulders and had a short trunk. These early mammals spread throughout Africa and into Asia and Europe, and as the age of mammals hurtled toward its climax, they began to increase in size. The best known descendants are the massive Stegodon, which may have been 26 feet long, along with the giants Woolly Mammoth and Mastodon, beasts of the ice age. From the same family tree came the Indian and African Elephants, although interaction with humans and millions of years of shifting climates have reduced their ranges back to the Indian subcontinent and Africa south of the Sahara.
